Re: The Home Front Command Annual National Drill 2018

Dear members of the Hebrew University community,

This week, the IDF Home Front Command Authority (HFC) for National Emergency is conducting its annual national drill, together with local authorities and emergency organizations throughout the country, in order to practice civilian preparedness for emergency situations.

Today, March 13th 2018, at 11:05 am and at 19:05 pm, a siren will be heard throughout the country during the drill. When the siren starts, text messages will be sent to mobile phones of a majority of the population in the country (and not to the entire population).

The following links will direct you to announcements made by the HFC regarding the drill.
